KEY TO NUMBERED ANNOTATIONS ON FIGURE 1

1. Probable POLTAVA/PEREKOP Merchant Vessel alongside quay (LOA approx 510')*. Identification of this vessel is based on the length overall and proportional analysis of the topside detail. A large floating crane is moored outboard of the merchantman. This berthing space was previously occupied by a SOFIYA Class Tanker. [REDACTED]
2. Unidentified vessel alongside quay (measurements undetermined). [REDACTED]
3. Unidentified probable hull under construction (measurements undetermined). Smoke and poor image quality preclude further interpretation. See [REDACTED]
4. Unidentified probable hull under construction (measurements undetermined). Smoke and poor image quality preclude further interpretation. See [REDACTED]
5. Probable SOFIYA Class Tanker under construction on the large building way (LOA approx 750'). Identification of this vessel is based on the length overall and comparison of visible topside detail observed on previous SOFIYA Class Tankers on this building way. [REDACTED]
6. Two unidentified probable small surface vessels inside the launching basin. The visible length of the vessel moored along the outside wall of the launching basin is approximately 140 feet. The length of the other vessel in the launching basin is undetermined. [REDACTED]

* All measurements have been made by CIA/IAS.

KEY TO FACILITY ANNOTATIONS ON FIGURE 1

- A. Due to drifted snow and shadows it cannot be determined whether construction is continuing on the quay extension.

25X1

- B. The water behind the cofferdam at the foot of the large building way is still removed.
